

Expert training today. Peak Growth Direct® performance tomorrow.

Unlock the full potential of your Growth Direct® System through expert-led training designed for your success.

Reliable, consistent microbiology QC results depend on knowledgeable, confident users. Our expert-led Growth Direct training program provides comprehensive instruction on the system, consumables, and RMB Nucleus™ software, helping your team maximize performance and efficiency. With four specialized courses, User, Supervisor, Administrator, and Superuser, your staff will gain the skills and confidence needed to operate, manage, and maintain the Growth Direct System.

Why invest in Growth Direct training?

Maximize your investment

Empower your team to fully utilize the Growth Direct System's capabilities, optimize workflows, and achieve greater operational success.

Build user confidence

Build operator expertise through hands-on training that promotes confidence, consistency, and operational excellence.

Strengthen compliance

Reduce risk through comprehensive training that supports audit readiness, data integrity, and regulatory compliance.

Boost productivity

Equip operators to work independently, troubleshoot issues efficiently, and help maximize uptime by reducing errors and unnecessary service calls.

What our satisfied customers are saying

"The training covers extensive content and is really well-structured. The alternating arrangement of theoretical sessions and hands-on practices delivers an excellent learning outcome."

"Our trainer is highly professional with an in-depth mastery of every detail of the equipment. All questions we raised during the session were thoroughly and clearly addressed."

"The most useful part was the practical session, in which I was able to immediately apply the concepts learned. It allowed me to better understand the definitions and consolidate my skills."

"The presentation and practical exercises were extremely informative and helpful."

Comments taken from course feedback surveys.

Find the right course for your needs

From learning the fundamentals of routine sample analysis on the Growth Direct System to preparing for regulatory audits and tackling advanced troubleshooting, our comprehensive training portfolio has the right course to meet your needs.

Growth Direct User Course

Duration: 1 day

Audience: QC scientists performing day-to-day testing on the Growth Direct System

Course overview: Through a combination of system fundamentals and hands-on operational instruction, participants learn how to manage microbiology testing workflows, properly handle consumables, perform routine maintenance, recognize and address common issues, and maximize system performance across environmental monitoring, bioburden, and sterility applications.

Growth Direct Supervisor Course

Duration: 1.5 days

Audience: Laboratory and quality management personnel responsible for overseeing sampling programs, guiding system users, and ensuring effective management of QC data and processes

Course overview: Supervisor Training goes beyond day-to-day system operation to provide the knowledge required to manage Growth Direct users, workflows, and data. Participants learn how to oversee testing operations, review results and audit trails, perform system management tasks, and support operators in resolving issues, helping ensure operational excellence and regulatory compliance across the laboratory.

Growth Direct Administrator Course

Duration: 2 days

Audience: QC systems owners and IT system administrators responsible for setting up, configuring, and enabling the Growth Direct System for laboratory use

Course overview: Participants gain the knowledge and hands-on skills needed to manage system settings, user roles, methods, workflows, reporting, and integrations, while supporting reliable and compliant laboratory operations. The course also covers IT/LIMS connectivity, troubleshooting, backup and recovery procedures, audit reporting, and advanced maintenance functions, equipping administrators to successfully deploy, maintain, and optimize the Growth Direct System.

Growth Direct Superuser Course

Duration: 2.5 days

Audience: QC team leads and system owners who act as laboratory subject matter experts, providing advanced troubleshooting, user support, and operational guidance for the Growth Direct System

Prerequisite: Participants are expected to have at least six months of hands-on experience with the Growth Direct System prior to attending this course.

Course overview: Building on the operational skills covered in User Training, this course provides a deeper understanding of the technology, system components, and workflows to develop the expertise needed to support laboratory users and maintain system performance. Participants gain hands-on experience with advanced troubleshooting and system recovery procedures, including access to and inspection of key system components such as the incubator and vision chambers.
